Dinosaurs Divide by 1

a game for 2 players

Need: pencils

Each player uses a different colored pencil. Players take turns to color two squares – a division and the matching answer. When all squares have been colored, the winner is the player with the longest line of their color around the edge of the rectangle.

Chickens Can Divide

Color a Division Equation

a game for 2 players Need: pencils
Players take turns to color the numbers to make a division equation, coloring one square from each set, e.g. a player could color 15, 3 and 5 for $15 \div 3 = 5$. Once a number is colored, it can't be used again. The winner is the last person to make an equation.

Using the Activities and Games

These are 'Print and Go' activities and games.
Simply print on paper and they are ready.
Players will require pencils.

Each of the activity sheets is to be completed independently.
Each game is for 2 players with 2 games provided on each sheet so that the game can be played twice.

Let's Practice and Play

The Activity Sheets and Games can be used separately or use the Practice & Play method for twice the practice and twice the fun!!!

Practice then Play

Complete this activity sheet to practice the skill.

Crazy Birds - Find a Line

Division Within 100

In each grid, color five lines of 3 numbers that make a division fact. The line must be 3 numbers next to each other in a row or column, e.g. color 4, 20 and 5 for $20 \div 4 = 5$. The numbers can be in any order, e.g. 4, 5, 20 or 5, 20, 4. Write the five facts under the grid.

Dinosaurs Divide by 1 Game

a game for 2 players

Need: pencils

Each player uses a different colored pencil. Players take turns to color two squares – a division and the matching answer. When all squares have been colored, the winner is the player with the longest line of their color around the edge of the rectangle.

Chickens Can Divide Game

Color a Division Equation

a game for 2 players

Need: pencils

Players take turns to color the numbers to make a division equation, coloring one square from each set, e.g. a player could color 15, 3 and 5 for $15 \div 3 = 5$. Once a number is colored, it can't be used again. The winner is the last person to make an equation.

Crazy Birds - Find a Line Game

Division within 100

Color a line of 3 numbers that make a division equation.

a game for 2 players

Need: Pencils

Players take turns to color a line of 3 numbers that can make a division fact. The line must be 3 numbers beside each other in a row or column, e.g. A player could color 36, 9 and 4 for $36 \div 9 = 4$. The numbers can be in any order, e.g. 36, 9 and 4 or 9, 4 and 36. The last player who can color a line of 3 numbers is the winner. One line is colored to show you what to do.

Colour a Division Equation

a game for 2 players

Need: pencils

Players take turns to colour the numbers to make a division equation, colouring one square from each set, e.g. a player could colour 15, 3 and 5 for $15 \div 3 = 5$. Once a number is coloured, it can't be used again. The winner is the last person to make an equation.

Crazy Birds - Find a Line Game

Division within 100

Colour a line of 3 numbers that make a division equation.

a game for 2 players

Need: Pencils

Players take turns to colour a line of 3 numbers that can make a division fact. The line must be 3 numbers beside each other in a row or column, e.g. A player could colour 36, 9 and 4 for $36 \div 9 = 4$. The numbers can be in any order, e.g. 36, 9 and 4 or 9, 4 and 36. The last player who can colour a line of 3 numbers is the winner. One line is coloured to show you what to do.
